Involvement for Youth Under Age 18

Children under the age of 16 are restricted from doing general construction. However, they may be involved in limited activities such as clean up, landscaping, yard work, watching children, fundraising, painting, and other appropriate activities.

Children between the ages of 16 and 17 may do general construction work, but can not be involved in any hazardous activities, such as using power tools, standing on tall ladders, roofing, demolition, etc.

All volunteers must fill out and sign the waiver form before volunteering on the work site. Persons under the age of 18 must have a parent or guardian sign their waiver form.
